

Installation Instructions

Pre-installation steps

- Create a backup of your shop before proceeding to install.

Manual Installation

- Sign in to your server via SSH
- `cd` into your Magento installation directory
- Upload *smarthint_module-1.0.0.tar.gz* into your Magento installation directory
- Extract the contents to `/app/code` directory
 - Example: `tar -xvzf smarthint_module-1.0.0.tar.gz -C ./app/code`
- Enable the extension: `php -f bin/magento module:enable --clear-static-content Smarthint_Module`
- Upgrade the Magento installation: `php -f bin/magento setup:upgrade`
- Compile the Magento installation: `php -f bin/magento setup:di:compile`

Configuration

- Login to your Magento Admin Dashboard
- Go to: System > Extensions > Integrations
- Click: **Add New Integration**
 - Add a 'Name'
 - Example: *Smarthint_Integration*
 - Under *Current User Identity Verification* add your password
- Click: **API**
 - Under *Resources* grant access to:
 - Products > Inventory
 - Sales > Order
- Click: The down arrow next to the **Save** button
 - Click: **Save & Activate**
 - Click: **Allow**
 - Copy all of your Integration Tokens:
 - *Consumer Key*
 - *Consumer Secret*
- Go to: Stores > Configuration
- Click on the *Smarthint* you wish to use for the integration
 - Copy the *ConsumerKey and Secret* value which will be visible in the URL

Uninstall

- To completely disable the module, run: `php bin/magento module:disable Smarthint_Module`
